

Old or troublesome boiler? You could be eligible for a **FREE** replacement!

Flexicom

If your old boiler is no longer working and your annual income is less than £15,860, or you receive state pension credit, you could be eligible for a FREE Glow-worm high efficiency boiler replacement, including the cost of all materials and installation!

To find out if you are eligible for a FREE Glow-worm boiler through this Government backed Affordable Warmth scheme, call your local accredited club^{eco} installer.

Free Glow-worm Flexicom boiler:

- Available as Combi, Heat only or System boilers in a range of outputs from 12 to 35kW
- High Efficiency with a NOx Class 5 rating
- Compact, fits in a standard kitchen cupboard*
- The first high efficiency condensing boiler in UK with a direct rear flue option
- Fitted by your local Glow-worm club^{eco} installer

* Sizes of kitchen cupboards vary. Please check boiler and cupboard dimensions prior to installations.

The Flexicom range

High efficiency condensing boiler;
cupboard fit with direct rear flue option

Compact and flexible

To replace an old boiler or install a new one with the minimum of fuss, you need one that will fit just about anywhere. That's why Glow-worm created the Flexicom - a High Efficiency condensing boiler that's so flexible, compact and simple to install it makes your life easy.

The Flexicom is compact enough to fit in a standard kitchen cupboard and was the first High Efficiency boiler in the UK with a direct rear flue, meaning that if you are looking to remove a standard efficiency boiler with a direct rear flue, the Flexicom will easily replace it. Available as a combi, regular heat only or a sealed system boiler with a wide range of outputs, the Flexicom is recommended by the Energy Saving Trust with a NOx class 5 rating.

Robust and simple

The Flexicom provides a quick and simple installation with no need to remove the front casing during installation thanks to the pre-fixing jig, upward piping frame and the drop down connection block. The aluminium heat exchanger also has wide waterways which enable the Flexicom to easily cope with system debris that have built up over time - ideal for retrofit.

Cupboard fit High Efficiency condensing boiler with direct rear flue option

Models available

cx - 24, 30, 35kW
hx - 12, 15, 18, 24, 30, 35kW
