

# A PATHWAY INTO WELDING

## What is the pathway into welding?

During this qualification you will develop the skills required to perform the welding process of your choice. You will produce a variety of welded joints and carry out destructive and non-destructive methods of weld testing to access if they are fit for purpose. Further more you will learn the fundamental technical knowledge relevant to your choice of welding process including; working in a safe manner, correct choice of consumables and appropriate utilisation of equipment and setting up procedures.

## Timetable

1 evening per week for a period of 15 weeks.

16:30 to 19.00

Thursday 16th July-Thursday 22nd October 2015

## What are the entry requirements?

No previous experience necessary

## Cost

£475 plus VAT with optional £100 for EAL Certificate

(Payments in instalments available)

## What is the content of the course?

You will develop skills and knowledge necessary to produce a variety of welded joints using the welding process of your choice.

The joints you will complete are:

- Beads on plate in the PA flat position
- Lap fillet joint in the PB horizontal/vertical position
- Tee fillet weld in the PB horizontal/vertical position
- Corner weld in the PA flat position

This course of learning can also be tailored to suit your individual needs.

## What qualification will I receive?

Alliance Learning Accredited Certificate or  
 EAL Level 1 Introductory Welding Skills Certificate

## Target Group

For individuals to gain a recognised Fabrication & Welding qualification or to be used as a first step into the industry.

- *Free Refreshments*
- *Free parking*
- *Training on state of the art technology*
- *Delivered by industry experts*

*If you would like to visit our Fabrication & Welding workshop before booking onto the course, feel free to give us a call to arrange this at a time to suit you.*
