

“DR ALLSOPP HAS COMPLETELY CHANGED MY CONFIDENCE”

Benefits

- 1 - Virtually invisible way to straighten your teeth - Invisalign® treatment is truly for everyone! Many of our adult patients enjoy having a discreet option and only takes between three and 18 months to give them a beautiful smile.
- 2 - Removable aligners make eating and dental care easy
- 3 - Your initial scan will show you what your future smile will look like
- 4 - Compatible with Virtual care for remote check-ups - we're always looking for the best way to help you fit orthodontic treatment into an already-full schedule. And now, Virtual Care helps you do just that. Just download the app to your smartphone, send us weekly selfies of your teeth, and let us do the rest!
- 5 - Diamond Apex Invisalign® providers offering you top-level care - Dr Allsopp has been recognised for his exemplary results with the Invisalign® treatment system. As a Diamond Invisalign® provider, he has created thousands of customised treatment plans for patients of all ages - and he can't wait to create one for you or your family member!

Invisalign

These are the incredible results of one of our recent patients that achieved these fantastic results having Invisalign and composite bonding treatment.

What is involved in these treatments?

Want a stunning smile without everyone knowing you're undergoing orthodontic treatment? Invisalign® clear aligners might be right for you. This innovative solution uses a series of removable clear plastic trays - instead of metal brackets - to straighten your teeth.

How does it work?

Invisalign® clear aligners are custom-made for your teeth. Every 10 days, our friendly team will advise you to change to a new set, which is slightly different from the previous one. As you wear them, they'll apply gentle pressure to your teeth, moving them into place.

“ THE RESULTS ARE HONESTLY ASTOUNDING ”

“ Dr Allsopp has completely changed my confidence with my new smile. The results are honestly astounding with how my teeth look now to how they were before, I just wish I did it years ago, which is obviously an old cliché but it's true! Can't thank him enough and would recommend him to anybody looking at dental treatment, I had Invisalign and some composite bonding to neaten some chips/bumps that had worn down over the years with how my teeth were twisted together, my Invisalign treatment I paid over time with a payment plan so it's affordable for anybody, and he even did my composite for free as my Invisalign treatment took a little longer than expected. Such a top bloke, will be recommending him to any person who asks about my treatment. Thanks again for everying mate. ”

Benefits

Getting a composite build-up or two can transform your smile. Although the treatment itself is minimal, the results can be dramatic, and you will enjoy:

- 1 - Whiter teeth
- 2 - A more even smile
- 3 - A healthier-looking smile
- 4 - Increased confidence in your appearance
- 5 - Financial savings, as composite bonding is an affordable cosmetic treatment

Composite Bonding

As well as Invisalign, to complete their dream smile they had composite bonding as you can see in the pictures below the transformation is just incredible.

Do you have any teeth that make you want to hide your mouth when you smile? Just one unsightly tooth could make you feel too embarrassed to laugh and smile freely.

We can improve the appearance of such teeth with a subtle, yet very effective cosmetic restoration called a composite build-up.

What is composite bonding?

A dentist will enhance your smile by shaping and bonding a small amount of composite dental material to a misshapen or discoloured tooth. 'Building up' your tooth with this resin-based material will help it look smooth, whole and even.
