

# Perfect Fit Formula

Find your perfect skirt length

The session costs : £80 for your Perfect Fit Formula report and £210 to include 1½ hours in your wardrobe identifying clothes for alteration.

If you are like me, when my clothes don't fit me properly, I stop wearing them. I then get frustrated not being able to find the perfect fit when I shop. I've discovered that by altering my jackets, dresses, skirts and trousers, getting the fit, sleeve length, hem length, waist line and even the neck line in line with my proportions, helps me feel so much more comfortable in my clothes. Over the years, I have saved thousands of pounds, not to mention the hours of shopping looking for things that were essentially, already in my wardrobe.

Find your perfect neckline depth

This approach can now be yours using your personalised report and a few hours of your time. I can't tell you how much difference it makes to be able to wear clothes that are comfortable and feel like they are made for me.

I would love to see as many of you as possible take advantage of this fabulous service. In fact, I am so eager to get my measuring stick out, that I am offering special slots on Friday 24 February. If you can come to me, and bring a selection of your wardrobe with you, then I am offering hour and a half slots for just £150; just email me (click below) to book your preferred time. Bring all those items with you that you absolutely know *should* work, but somehow they're just - not quite right, and let's see if we can make them better! If you can't make that day, then of course, let me know you'd like to do this and we can sort out a date and time that works for both of us!

At House of Colour we are excited to bring you the Perfect Fit Formula. 12 simple measurements that put everything in proportion. You'll be professionally measured and receive a personalised report that gives you the mathematically exact points for hems, sleeve lengths, necklines and necklaces, belt widths and much more, producing the maximum impact in your look.

The formula adds more science and precision to what you've already learned at your Colour and Style classes. Perfection is possible! If you choose to include the 1½ hour follow up appointment 'in your wardrobe', I'll show you how much impact a few changes will make to items you already own.
