

Press Release

Another points finish for Leon and the Geo E Davies Team! A well-deserved result for their weekends work at Donington Park where they were supporting the Acerbis UK Round of the WorldSBK event. This result keeps the momentum gained over the last couple of rounds rolling.

Free practice went extremely well for Leon and he and the team used it to fine tune the BMW S1000RR for the only qualifying session this weekend. After posting a time just outside the top ten he was confident of improving on it for a grid position in the race. Qualifying was a tense affair with just half second covering fourth to tenth place by the end of the session, but Leon kept a calm head and posted tenth fastest and achieved his coveted top ten grid position.

Making a good start Leon held his position and settled into a good race pace. Fighting hard over the sixteen laps he picked his way through and finished in a fantastic eighth place. A great result for rider and team as they build confidence and impetus every time they go out on track.

Speaking after he said "The weekend started great, we had good pace in free practice and knew that with just a couple of changes we could aim for Top 10 in qualifying. We did that with a 10th place grid spot and backed that up with 8th in the race. We weren't lapping much behind 5th place times so can take the positives from the weekend and aim better next time out. Just want to add my thanks and appreciation to my sponsors, family and friends without them this adventure wouldn't be possible."
