# Cosmetic dentistry at Elmsleigh House

---

Whether you need your teeth whitened, straightened, reshaped or replaced, Elmsleigh House offers an extensive range of cosmetic dental treatments designed to improve the appearance of your teeth and smile.

We treat each of our patients uniquely and understand that people's teeth change throughout their lives, and that requirements are so individual and personal.

That's why we take the time to really get to know you, your lifestyle and what you would like to achieve with your teeth. We want you to experience the confidence of knowing that your smile is attractive and your mouth is healthy; the outcome of which can have a dramatic effect on your self-esteem.

With everything under one roof, we can consult, assess, identify and treat comprehensively. Your treatment plan will be completely bespoke, detailing all treatment needed and fees involved. We guarantee these fees will not change throughout treatment, so you can be confident in the most personalised, professional result. We believe you will appreciate the difference.

# Advanced solutions to enhance your smile

---

Our team offers extensive experience, using the most researched materials and proven techniques to eliminate imperfections in your teeth and improve your smile. Some of the techniques and treatments we offer include:

- **Teeth whitening.** Whitening gently removes stains that accumulate over time to give you a natural-looking, brighter smile. You simply apply whitening gel to custom-made mouth trays that fit your teeth precisely, and wear them for several hours, as specified by your dentist, until you have achieved your desired shade. Over time you can ‘top up’ the treatment to restore your brighter smile.
- **Teeth straightening.** No-one needs tolerate crooked teeth or an uneven smile. Advances in specialist orthodontic treatment mean that children, teenagers and adults can benefit from a range of bespoke systems, such as Insignia, Incognito and Damon fixed braces and Invisalign removable aligners. We also offer faster teeth straightening to adults of all ages with anterior alignment systems such as Cfast and Clear Aligners, which focus solely on moving the front teeth.
- **White fillings.** Many people have old amalgam (silver) fillings that they now feel are unsightly. Replacing these fillings with the latest tooth-coloured materials can leave your mouth looking natural and healthy.
- **Dental implants, bridges and dentures.** If you have lost one, several or all your teeth, dental implants offer a secure solution. Essentially ‘bionic roots’, these titanium screws integrate with your jawbone and actively prevent bone loss. They provide a stable anchor for your crown, bridgework or implant-stabilised denture, which are made to look, fit and function just like your natural teeth. We can find a solution for all budgets, and high-quality, precision-made dentures can offer a cost-effective replacement for missing teeth.
- **Crowns and veneers.** Crowns can be used to repair cracked, broken, decayed or heavily filled teeth. They are very strong and can be colour-matched perfectly to your natural teeth. Veneers can be bonded to the front of your teeth to close gaps or hide discoloured, misshapen or crooked teeth.
- **Cosmetic reshaping.** Tooth-coloured bonding can be used to reshape and restore chipped, fractured or overcrowded teeth. Cosmetic gum surgery can be used to reshape your gum line and improve the appearance of your smile.

Whatever tooth issue you want to resolve, we are confident that our experienced team can provide the right cosmetic dentistry solution for you. **Because Every Smile is Unique.**

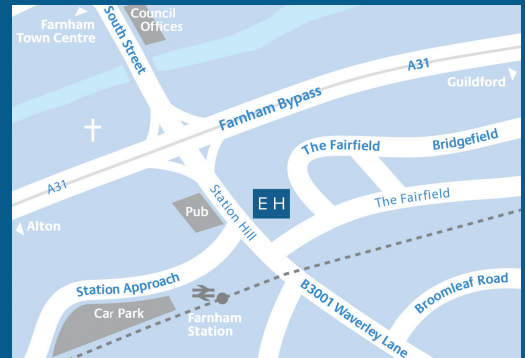

We look forward to  
seeing you

ELMSLEIGH HOUSE

— DENTAL CLINIC —

Farnham is easily accessible from the M25, M4, M3, A3 and A31, and Elmsleigh House Dental Clinic is located directly opposite Farnham train station. Free parking spaces can be found at the rear of the practice in The Fairfield, providing level access to the clinic, and there are public car parks at the station and in the town centre within walking distance.
