

Wolverhampton Workers' Memorial Day is part of an international day of action and remembrance every 28th April for workers killed, disabled, injured or made unwell by their work; we highlight campaigns to prevent future work-related injuries.

WORKERS MEMORIAL DAY

MONDAY 28 April 2025

Wages are paid in exchange for your labour, not your health.

Yet every day 6,000 workers die worldwide as a result of work related accidents and diseases.

Health and safety improvements have come about only because of pressure to improve standards.

Trade Unions and the Safety Reps they elect and train, have played a key part in these changes and continue to campaign to safeguard workers.
